SEAN BANNON

17908 Gottschalk Ave, Homewood, IL 60430   (708) 408 - 7177   seannbannon@gmail.com

SKILLS

HTML5, CSS3, Javascript, React, MongoDB, MYSQL, Git, NodeJS, Bootstrap, Express, Heroku, jQuery,

SUMMARY

After trying a wide variety of careers ranging from wildland firefighter to substitute teacher, I have spent the last 10 years of my career trying to find the right fit, utilizing a dozen unique jobs. I stumbled into computer programming after seeing the potential power it holds within. I am looking for a position to broaden and deepen my knowledge of computer programming.

JOB EXPERIENCE

Land Steward, The Nature Conservancy — 2016, 2019

From zero knowledge to burning 20,000 acres of wildland - I learned how to identify wild plant species, use tests to determine the relative health of an ecosystem, how to effectively eradicate invasive species, how to safely deal with large wildfires and escapes, and how and when to collect, distribute, propagate, and clean native seed - from nothing in a relatively short space of time.
